

## Camp Guidelines 2020

This summer, we will follow CDC guidelines for "lowest risk". Published guidelines by the CDC:

<https://www.cdc.gov/coronavirus/2019-ncov/community/schools-childcare/summer-camps.html>

**"Lowest Risk:** Small groups of campers stay together all day, each day.  
Campers remain at least 6 feet apart and do not share objects.  
Outdoor activities (ie. with good ventilation) are prioritized.  
All campers are from the local geographic area (e.g., city, town, county, community)."

### **Club Camp Guidelines during this Safe Start phasing also include WA state requirements:**

- Camp groups limited to 5 players plus instructor.
- Camps can be booked on weekly basis only (no daily). As a result we discounted all camps by 20% (essentially they all get the early bird price), which means 5 days for the price of 4.
- Each Monday, students will be assigned into a group for the entire week. Groups will be based on ability, with consideration given to age and experience. These are assigned by the Director of Junior Tennis and other Tennis Pros. The intent is to minimize mixing players with other groups.
- Each Monday, Pros should explain any reminders for spacing a racquet apart, using hoppers, etc.
- Assign color-coded hoppers to each camper so they do not need to handle balls. Pros clean hoppers and any chairs or items touched in between camps.
- Use poly-dots and other tools to identify and remind players to maintain space.
- Camps may end 5 minutes early to pick up courts and vacate before the next group comes on.
- At the end of the week, Pros may advance players to another level.
- In order to maintain compliance with the "lowest risk" criteria, we cannot offer single day make-ups, substitutions or credits. Campers must plan on working with their group for the week.
- Offer small group instruction for families or friends that want to work together outside of the programmed junior camps schedule.
