

Introducing **Match Maker**, a new feature to help players make Doubles matches.

An exciting new **Match Maker** feature on the Court Reserve app will roll out in June. Advantage members will be able to **create Open Doubles court reservations** and other members may then **FIND OPEN MATCH** to join open reservations from the app. Most often, the feature is used when one or two members want to reserve a court and allow other players to join them.

Create the Open Doubles Match:

Members may create the Open doubles match on the app by opening Court Reservation, Book a Court, and select Doubles as the Reservation type. You may Add Players that you already know are in your group, and the remaining spots will be OPEN for other members to find. Toggle Open Reservation ON and a sub-menu appears where you will be able to fine-tune your match by selecting criteria such as Gender, Rating, Member Group, and add a comment.

Doubles court reservations can be made and finalized without using an Open Match when you have 4 eligible names. When originating an Open Match, you may add players you know are eligible and leave the remaining spots Open. The ability to originate an Open Match is available to Advantage members, who have 5-day advance privileges.

Find an Open Match:

The Court Reserve app will now include an additional top menu item: **Find Open Match**. The open match will also be visible on the court schedule. Members may look through the open matches in date order or set criteria: Gender, Rating, or Member Group to filter what they are looking for. An Open Match will show in red the time remaining to fill and finalize the match. An Open Match that does not finalize 24 hours ahead of the reservation start time will automatically cancel off the court sheets.

Advantage Members will be able to join matches within their 5-day advance privileges and Regular Members will be able to join matches within their 2-day advance privileges.
