

**Evergreen Tennis Strings  
Labor \$22**

\$21.99	Babolat RPM Blast/Utilmate Spin 16g (orange)	Co-polymer monofilament	The slick surface of RPM Blast allows the main strings to slide out of alignment, grab the ball and then snap back to add spin to the shot. An ideal choice for big hitters with heavier racquets.
\$21.99	Babolat Xcel 16g (blue)	Poly Multifilament	The increased elasticity of the fibers also provide optimal comfort and better tension maintenance. This string is the ideal for players looking for the best combination of comfort and durability.
\$16.99	Gamma Moto Soft 16g (gray)	Co-polymer monofilament	This ultra responsive string offers exceptional comfort, controllable power and above average durability for a non-poly. It features Gamma's legendary TNT2 processing for greater energy return and a heavier ball.
\$16.99	Gamma TNT 2 16g (white, black)	Elastilon core	This ultra responsive string offers exceptional comfort, controllable power and above average durability for a non-poly. It features Gamma's legendary TNT2 processing for greater energy return and a heavier ball.
\$11.99	Head Synthetic Gut 16g (white, black, natural)	Nylon Core	SOFT AND POWERFUL: Head Synthetic Gut PPS White Colored Multifilament Tennis Racquet String Sets are the perfect blend of comfort, control, and power. Like most multifilaments, it has a nylon core, but what sets it apart is the PowerStrip Technology: a special polyamide is wrapped around the solid, inner core and it provides increased string resilience which increases power on every shot.
\$16.99	Head Rip Control 16g (natural)	Poly multifilament, ribbon outer	The ribbon composite construction of this string is designed to offer comfort and control. A great choice to improve the comfort of a stiff frame. Offers a good mix of playability and durability.
\$16.99	Head Lynx 16g (yellow, green)	Monofilament.	This string is ideal for players with long, fast strokes. With its lively snapback, Lynx should help topspin players hit a heavy spin loaded ball that explodes off the court. Built with additives to increase elasticity and feel.
\$21.99	Head Hawk Touch 16g (black/red)	Crystal core poly	Crisp with controllable power and massive spin. Great for big hitters looking to hit a heavy ball. Above average comfort for a firm monofilament.
\$22.99	Head Reflex MLT (17g)	Multifilament	Reflex MLT is one of the best multifilament strings from Head. The defining feature of this string is comfort. When paired with a stiff racquet or a dense (less forgiving) string pattern, Reflex MLT is a very generous sweetspot, with almost no shock on off-center hits.
\$20.99	Luxilon Original 16g (natural)	Co-polymer	Big Banger Original offers excellent control and plenty of spin while maintaining tension.
\$22.99	Luxilon 4G 16g (gold)	Co-polymer	Extremely playable co-poly with above average tension maintenance for the breed. Firm and durable with exceptional bite and control.
\$18.99	Solinco Tour Bite 16g (silver)	Co-polymer	This thinner gauge polyester comes in a square shape for tremendous ball bite. Offers excellent control and spin.
\$19.99	Solinco Hyper G 16g (green)	Square co-poly	Solinco Hyper-G is a square shaped co-poly with an impressive combination of spin and precision
\$18.99	Wilson Revolve 16g (black)	Poly pentagon-shape	Offering a comfortable firm response along with huge spin potential, Wilson Revolve delivers incredible control on the biggest swings.
\$22.99	Wilson Comfort NXT 16g (natural)	Multi Nylon Mmultifilament	One the best playing synthetic strings on the market. Multifilament construction that looks, feels, and plays very much like Natural Gut.
