

**Evergreen Tennis Strings**  
**Labor \$22**

\$21.99	Babolat RPM Blast/Ultimate 16g (black)	Co-polymer monofilament	The slick surface of RPM Blast allows the main strings to slide out of alignment, grab the ball and then snap back to add spin to the shot. An ideal choice for big hitters with a heavier racquet. Recommended for players looking for more <b>POWER</b> .
\$16.99	Gamma Moto Soft 16g (gray)	Co-polymer monofilament	This ultra-responsive string offers comfort, controllable power and above-average durability for a non-poly. The defining feature of this string is the 7-sided shape, creating tremendous <b>SPIN</b> and power.
\$15.99	Gamma TNT 16g (yellow, black)	Elastilon core	The ball will explode off your string bed with focused potential. Exceptional <b>POWER</b> and durability for a synthetic. It features Gamma's legendary TNT2 processing for greater energy return and a heavier ball.
\$11.99	Head Synthetic Gut 16g (white, black, natural)	Nylon core	A good <b>ALL-AROUND</b> string. Head Synthetic Gut is the perfect blend of comfort, control, and power. Like most multifilaments, it has a nylon core, but what sets it apart is the PowerStrip Technology: a special polyamide is wrapped around the solid, inner core and it provides increased string resilience which increases power on every shot.
\$22.99	Head Hawk Touch 17g (red, black)	Crystal core poly	Crisp with controllable power and massive spin. Great for big hitters looking to hit a heavy ball. Above-average comfort for a firm monofilament. Popular for players looking for <b>POWER</b> with comfort.
\$20.99	Head Rip Control 16g (black/white)	Multifilament	Rip Control is one of the best multifilament strings from Head. The unique polyolefin ribbon construction packs shock absorbing filaments into a pliable casing. Rip allows <b>CONTROL</b> without having to give up comfort.
\$23.99	Luxilon 4G 16g (gold)	Co-polymer	Extremely playable co-poly with above average tension maintenance for the breed. Firm and durable with exceptional bite and control. Recommended for players looking for <b>DURABILITY</b> .
\$19.99	Solinco Tour Bite 16g (silver)	Co-polymer	This thinner gauge polyester comes in a square shape for tremendous ball bite. Offers excellent control and spin. Recommended for players looking for more <b>SPIN</b> .
\$19.99	Solinco Hyper G 16g (green)	Square co-poly	Solinco Hyper-G is a square shaped co-poly with an impressive combination of <b>SPIN</b> and precision <b>POWER</b> .
\$23.99	Tecnifibre X-One Biphase 17g (red, natural)	Elastyl fiber multifilament	Extremely arm-friendly string that plays and feels similar to natural gut. Perfect for players with tennis and shoulder concerns who are looking for a powerful string. Recommended for players looking for <b>COMFORT</b> .
\$19.99	Wilson Revolve 16g (black)	Poly pentagon-shape	Offering a comfortable firm response along with huge <b>SPIN</b> potential, Wilson Revolve delivers incredible control on the biggest swings.
\$23.99	Wilson Comfort NXT 16g (natural)	Multi nylon multifilament	One of the best-playing synthetic strings on the market. Multifilament construction that looks, feels, and plays very much like natural gut, and similarly lacks durability. Popular due to exceptional <b>COMFORT</b> .
